Professinal Profile

Hello! I'm Houssam Hamdy, a Full-Stack developer fully committed to my software engineering studies at 1337. Driven by self-discipline and a passion for tackling real-world challenges, I enjoy delving into new technologies. My excitement spills over into the ever-evolving world of the web3 industry, showcasing my commitment to staying at the forefront. Eager to contribute my skills and creativity, I actively engage in the dynamic field of software development.
Core Skills

Full-Stack development :	**HTML/CSS - React - Tailwindcss - Js/Ts - NestJS**
Web3 / Blockchain :	**W e b 3 j s - S olidity - RemixIDE - Smart-contract - Ganache**
system :	**C - C++ - Git - Shell Scripting**
DevOps :	**Docker - Docker-compose**

Education

1337 (42 Network), Benguerir
November 2021 - 2024

Student at 1337 School, currently at level 13.74, with strong skills in software development.

UM6P - Mohammed VI Polytechnic University · Internship
Janvier - 2024

Full-Stack Devloper

Projects

Ft_transcendence
https://github.com/h-hamdy/ft_transcendence

Collaborated in a dynamic team to develop the ft_transcendence web project—a multifaceted online ping pong game enriched with interactive features. Led the front-end development using cutting-edge technologies, including *React* for dynamic user interfaces, TypeScript for enhanced code quality, and Tailwind CSS for streamlined styling. Contributed to the project's success by seamlessly integrating these technologies to create a visually appealing and highly functional web application.

CRM System
https://github.com/h-hamdy/CRM-project

Developed a flexible CRM platform using React and NestJS, designed to help businesses manage their client relationships effectively. The system allows for customizable client data management, intuitive user interfaces, and seamless integration with existing business processes, catering to a wide range of business needs.

Inception
https://github.com/h-hamdy/inception

In the Inception project, I delved into the world of Docker, gaining hands-on experience and insight into containerization. This venture not only enhanced my understanding of this powerful tool but also laid the foundation for efficient software deployment and management. Through practical exploration and application, I mastered the intricacies of Docker, adding a valuable skill set to my coding repertoire
